CHAITANYA GOKHALE

FULL-STACK DEVELOPER

Badlapur (E), Maharashtra, India | 7977028071 | gokhalechaitanya9@gmail.com
github.com/ItsChaitanyaG | linkedin.com/in/chaitanya-gokhale-045b222a5 | Open to on-site, remote, and relocation

PROFESSIONAL SUMMARY

Full Stack Developer skilled in building responsive web applications and developing end-to-end solutions using modern web technologies. Experienced in integrating AI capabilities into applications using LLM APIs, with a focus on practical, user-centric products. Interested in problem-solving, maintainable code, and building efficient software solutions.

PROJECTS

NeoBank – Digital Banking Web Application (Capstone Project) | *Jun 2026 – Aug 2026*

React, Tailwind CSS, Node.js, Express.js, Prisma ORM, PostgreSQL, JWT, Groq API | Live Demo | Source Code

- Built a full-stack banking application with customer and admin experiences, including registration, KYC document submission, account management, beneficiaries, deposits, withdrawals, transfers, and transaction history.
- Implemented backend business rules for KYC approval, transaction limits, balance validation, and beneficiary limits; used database transactions to maintain consistency in financial operations.
- Secured endpoints with JWT authentication, bcrypt password hashing, protected routes, role-based authorization, and server-side validation; built admin workflows for KYC review and transaction/customer search.
- Integrated the Groq LLM API to generate personalized transaction insights, spending summaries, income-versus-expenditure analysis, trends, and savings suggestions.

themeDex – AI-Powered Theme Installation Guide | *Jun 2026 – Present*

React, Express.js, FastAPI (Python), Groq API | Source Code

- Building an AI guide generator for Linux customization repositories that turns public GitHub repository URLs into beginner-friendly, step-by-step installation guides rendered as Markdown.
- Developed a FastAPI microservice using the GitHub API to retrieve README content and inspect referenced installation scripts, grounding LLM-generated guidance in repository data.
- Built an Express.js backend to coordinate the repository analyzer and LLM, with structured prompts and centralized error handling.

AI-Powered Portfolio & JD Compatibility Analyzer | *Live*

React / Next.js, FastAPI, LLM API | GitHub: github.com/ItsChaitanyaG/portfolio_ai

- Developed and deployed an AI-powered portfolio with a conversational assistant that lets recruiters ask questions about skills, projects, and experience.
- Integrated an LLM API to answer recruiter queries and generate job-description compatibility scores.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Java, HTML5, CSS3
Frontend: React.js, Next.js, React Router, Tailwind CSS, DaisyUI
Backend: Node.js, Express.js, FastAPI, Prisma ORM, REST APIs, JWT, role-based access
Databases: PostgreSQL, MongoDB, MySQL
AI / Cloud: Groq LLM API, LLM API integration, Cloudinary, Vercel, Render
Tools: Git, GitHub, Postman, VS Code, Linux

EDUCATION

Master of Computer Applications (MCA, Online) – Jain University, Bangalore | 2024–2026
Specialization: Full Stack Development; final examination completed, result awaited.

Bachelor of Commerce (B.Com) – N.G. Bedekar College of Commerce, Thane | Jul 2021–Apr 2024 | CGPA: 8.43

LANGUAGES

English, Hindi, Marathi
